

## SANDY SCOTT - SCULPTURE

### List of Supplies

1. Clay – 8-10 lbs. Chavant Le Beau Touche. Get the regular clay, not HM (high melt)
  - The Center for the Arts will have this clay available for this workshop for a fee.
2. Clay warming devices, a metal bucket with a clamp on heat lamp or 100 W bulb works great
3. Tie wire - available at hardware stores or Home Depot
4. Aluminum foil
5. Scissors
6. Favorite sculpture tools
7. Wire cutters
8. Needle nose pliers
9. Rubber mallet
10. Spatula
11. Measuring devices such as ruler, measuring tape, dividers and calipers.
12. Because we concentrate on BIRDS IN FLIGHT, live models in the classroom are more distracting than useful. I will demonstrate the technique of constructing a cantilevered bird armature that can be used for many different bird species and will show you how to assemble shapes to capture the "giss" of the specific bird.
13. Students should bring a Bird field guide such as Peterson, Stokes, Golden or Sibley's. "Sibley's Guide to Birds" not "Sibley's Guide to Bird Life and Behavior" which is a different book. Sibley's is a very popular book and can usually be purchased at any book store.
14. Workbook – The workshop is loaded with information and to prevent extensive note taking a workbook for each student will be provided for the cost of printing and binding.  
Cost is 45.00 each. The student keeps this great source of instruction and reference.

### **In addition each student will need the following:**

15. Plank of wood (pine) approximately 8" x 8" x 2". Bring at least 2 planks; the wood is used as the base for your sculpture. Photos of the set-up are attached.
16. Plumber's pipe, 1/2" threaded: Bring several different lengths...up to 10" ...not PVC pipe.
  - Plumber's pipe T joint
  - Plumber's pipe couplers
  - Plumber's pipe flange
17. Screws and screwdriver to secure flange to wood...this may be done before you arrive. (Place the flange in center of plank). Trish will be available with a power screwdriver to assist students with their armature setup.
18. WIFI is available in the studio, students should bring their laptop or tablet.
