3D Art & Sculptures Come and explore the wonders of 3-dimensional art and sculpture. Imagination is your guide to creating unique and adventurous artwork. Students will use clay, cardboard, paper, and other found recycled materials.

Adventures in Filmmaking And...the Oscar goes to... you! If you've ever wanted to see your face on the big screen, then this is the class for you. You'll act in your own short film and learn to edit it too!

Art Outdoors Art is all around us. Young artists take inspiration from their natural surroundings and the creatures that inhabit it. With a little imagination, flowers, leaves, twigs and shells can be transformed into works of art.

Art Around the World Explore art techniques and traditions from different cultures around the world. Discover the differences and similarities of how countries use art and create your own worldly masterpieces.

Cookonomics You're the next "top chef" in this scrumptious culinary adventure where you learn about cooking through hands on experience. Explore a selection of ingredients, preparation and presentation techniques.

Creating Optical Illusions Students will use color, light, perspective and patterns to create images that are deceptive or misleading to the brain. Students will create remarkable three-dimensional illusions from a flat canvas or paper and make their art pop off the page!

Digital Drawing & Animation Students use a digital drawing pad to draw on the computer and learn the computer program Toon Boom. With the software students learn fundamental drawing, storytelling and animation skills to bring their stories to life.

Drawing & Painting Learn fundamental drawing and painting techniques in this exciting class. Work with pencil and pen, pastels, acrylics, watercolors and more.

Inventors' Workshop Calling all inventors and big imaginations! Develop and design your own creation that is fun and functional. Learn how to come up with ideas, create real products and bring them to life with drawings and 3D models of your original design.

Fashion Forward Implement your bold fashion ideas while learning about color, fabric, texture and pattern. Students learn design elements, styles, trends and couture as they explore sketching, pattern drafting, fabric selection and basic sewing.

Master Artist Series Explore art styles and techniques by some of the greatest artists of all time and create your own artwork in their style - Picasso, Warhol, van Gogh, Monet, Dali, da Vinci, and many more.

Science & Art Creative learning at its best! Through science experiments students engage in hands-on learning, observe cause and effect first hand, and create a beautiful piece of art.

Stop Motion Animation Dive into the movie making process and learn how to animate an inanimate object using anything from modeling clay and toys to construction blocks and drawings. Students will learn to use the HUE Animation Studio software and camera while creating their own scripts, storyboards, backdrops and characters.

Tie Dye Art Design your own tie dye t-shirts, pillowcases, accessories and more! Learn about color mixing and different wrapping methods that create interesting dye patterns.

The Possibilities of Paper Students will explore the endless possibilities of paper in this exciting class. Projects include pop up art, sculptures, kites, weaving, journals, origami, puppets, stationary and more.

Wheel Throwing Sitting at the potter's wheel and forming a spectacular bowl, cup or vase is fun and rewarding. Students learn to wedge clay and throw on the wheel. Pieces are finished with colorful glazes for a professional look.
